KANSAS, THE WONDER STATE

New Things Are Old in the State of Innovations.

Just think what Kansas has been, and how bad, and so, writes Julian Street in Collier's Weekly. Think of the border warfare over slavery which began as early as 1820, of settlers, traveling out to "bleeding Kansas," overland from New England, merely to add their abolition votes of early struggles with the rail, and of the final triumph. Kansas is today the first wheat state, the fourth state in the value of its assessed property (New York, Pennsylvania and Massachusetts only outranking it), and the only state in the union which is absolutely free from debt.

It has a more American population, greater wealth and fewer mortgages per capita, more women running for office, more religious conservatism, more political radicalism, more students in higher educational institutions in proportion to its population, more homogeneity, more individualism and more nasal voices than any other state. As Colonel Nelson said to me: "All these new ideas they are getting everywhere else are old ideas in Kansas." And why shouldn't that be true, since Kansas is the state of Socrates, Jerry Simpson, William Allen White, Ed Howe, Walt Mason, Stella Funston, Harry Allen, Victor Murdock and Harry Kemp, the state of Susan B. Anthony, Carrie Nation and Mary Ellen Lease—the same Sweet Mary Ellen who remarked that "Kansas ought to raise less corn and more hell."

Kansas used to believe in populism and free silver. It now believes in hot summers and a hot hereafter. It is a prohibition state in which prohibition actually works, a state like no other so much as some scriptural kingdom—a land of floods, droughts, cyclones and enormous crops of prophets and plagues. And in the last two items it has sometimes seemed to actually embody the Bible by combining plague and prophet in a single individual, for instance, Carrie Nation or again, Harry Kemp, "the tramp poet of Kansas," who is now of being a kind of Carrie Nation of convention.
